EDUCATION

University of Nevada Las Vegas — Las Vegas, NV
- Master of Science in Computer Science — Expected May 2027
- Focus: Software Engineering

University of Nevada Las Vegas — Las Vegas, NV
- B.A. Computer Science — GPA: 3.82 | May 2025

TECHNICAL SKILLS

Languages: C | C++ | Python | JavaScript/TypeScript | HTML/CSS | BASH
Frameworks: React | JWT | bcrypt.js | Tailwind CSS
Cloud & DevOps: AWS (S3 | Lambda | DynamoDB | EC2) | Docker | GitHub Actions (CI/CD)
Developer Tools: Git | VS Code | IntelliJ IDEA |LaTeX

PROFESSIONAL EXPERIENCE

Freelance Web Developer | *React, TailwindCSS, Lambda, S3* — Remote
Independent Contractor — Aug 2024 - Present
- Designed, deployed, and operated serverless applications on AWS using Lambda, DynamoDB, and S3, focusing on low-latency runtime behavior and scalable cloud infrastructure.
- Phone Repair Business Website: Built a single-page site featuring service pricing, integrated a contact form for reservations.
- Hookah Lounge Website: Developed a multi-page site with interactive menu, reservation system, weekly event catalog, and embedded map integration, enabling **30% increase** in customer inquiries.

Teaching Assistant - Operating Systems — Las Vegas, NV
University of Nevada Las Vegas — Jan 2025 - May 2025
- Guided **120+ student**s in implementing system-level components including process schedulers, virtual memory, and custom system calls in xv6, strengthening Linux OS fundamentals.
- Provided detailed feedback on programming assignments involving system calls, process scheduling, memory management, and inter-process communication, helping students improve code quality & conceptual understanding.
- Aligned technical expectations with course requirements; implemented a feedback loop that increased satisfaction ratings by 40% in the end-of-semester survey.

PROJECTS

Housing Price Prediction using Linear Regression – Applied feature engineering, normalization, and SelectKBest feature selection to train a Linear Regression model in scikit-learn, achieving accurate price predictions with 10-fold cross validation & RMSE evaluation.

Gym Member Classification using Neural Networks – Implemented a multi-layer perceptron (**64–32 hidden layer**s) in scikit-learn to classify gym members' gender, achieving **93% accuracy** (Precision 95%, Recall 92%) with feature scaling, cross-validation, and visualization.

BlackjackPro Web App – Architected a serverless full-stack app on AWS (S3, Lambda, DynamoDB), integrating JWT authentication and CloudFront distribution. Applied IaC (AWS SAM) for reproducible deployments.

Personal Portfolio Website – Developed and deployed a personal portfolio website using React and Tailwind CSS, hosted on AWS S3 & Cloudfront with a custom domain.

Operating Systems Kernel Extensions (xv6, C) – Implemented custom system calls and modified scheduler to a two-level feedback queue. Added runtime debugging utilities for process execution and virtual memory statistics.

ACTIVITIES

Involvement: Association for Computing machinery(ACM)
Awards/Achievements: Competed in the SoCal ICPC Regionals (2024-2025)
Certificate: AWS Cloud Practitioner Certified
